GRAPHIC DESIGNING

Logo and branding is the primary look of your organization's picture. Buildcon Technologies helps to evoke positive responses of the target group, generate customer (my brand), expand the number of loyal clients and presents the brand consistent through out all available media channels by offering logo and branding services.

We are a team of creative thinkers, passionate designers, crazy developers, and enthusiastic marketers. These are the people who have become our identity, our strength, and the reason to be known as the best. However, initially, it was not easy. It has been one amazing journey that transformed us over the years and helped maintain this remarkable reputation.

Poster Design

Posters are different from books or articles in the way they convey information. People view a poster from both far away and close up.

Profile Design

A well-designed and written company profile makes it possible to efectively deliver key information about your company to your potential customers and investors. It is also an important tool to help you to present a professional image.

Brochure Design

Brochure design matter a lot because you must make a desirable impact on your clients or target customers at that very moment when a brochure is picked from the shelf. Do not let that moment go waste. Catch the viewers' eyes instantly and get them to read your brochure from start to finish. Your brochure should reflect your brand and its values. It should help your business win their trust.

Packaging Design

Here, we'll take you through the process of creating stellar product packaging for your product, from creating materials that make sense for your brand through the shipping process.

Email Marketing
Social Media Marketing

A digital marketing agency can be a valuable part-ner to your business, though you may not fully realize all they can do for you. As a sales or marketing manager, your job is to bring in customers through your business' "front doors

Today, 81 percent of customers conduct online re-search before making a purchase decision, which means it's imperative to develop a robust online presence that engages and nurtures customers online throughout their customer journey. A digital marketing company can do this for your business, plus a lot more.

What is Digital Marketing?

Digital marketing is a multifaceted strategy aimed to target, reach out to, and build relationships with customers online, across a broad range of channels, ultimately getting them to make a purchase and more purchases in the future.

The results of digital marketing are dramatic. Blog-ging alone can help brands bring in 67 percent more leads compared to those that never post. SEO also boasts a conversion rate of 14.6 percent, which is dramatically higher than the 1.7 percent conversion rate that traditional outbound methods deliver.

DIGITAL MARKETING SERVICES

Why is Facebook good for marketing?

Facebook marketing is a platform that offers a variety of highly targeted paid advertisements and organic posts, allowing brands to put their products and services in front of the massive audience. Over the last decade, Facebook has shifted from the most prominent social medium on the internet into one of the biggest marketplaces.

Benefits of Facebook Marketing

Precise targeting
Increased website traffic
Variety of ad formats
Customer support
Positive impact on SEO

Why Market on Instagram?

Instagram's primary advantage over other social media platforms is its visual nature. If you have a business that benefits from the design of your product or if you have a service that has a visibly noticeable end result, Instagram is the best platform to showcase that content.

Video, imagery, and illustration are all great content fits for this social media platform, but your marketing strategy will ultimately determine what type of content to publish and how often to post it. Establishing a strategy before diving right into a new social media platform, no matter how well it works for everyone else's business, will keep you focused on your goals and — most importantly — your audience.

HOME AUTOMATION
SMART & SECURE LIFESTYLE

Home automation is exactly what it sounds like: automating the ability to control items around the house from window shades to pet feeders with a simple push of a button (or a voice command). Some activities, like setting up a lamp to turn on and off at your whim, are simple and relatively inexpensive. Others, like advanced surveillance cameras, may require a more serious investment of time and money.

Smart Curtain

Smart Switch

Smart Lights

Temprature control

Smart Door

Voice Control

Smart Plug

There are many smart home product categories, so you can control everything from lights and temperature to locks and home security devices. They also happen to make fantastic gifts, whether you're shopping for the holidays or buying a house warming present. Here's a rundown of the best products we've tested for every room of the house.

CCTV SECURITY SYSTEM

COMPONENTS OF A CCTV VIDEO SURVEILLANCE SYSTEM

There's a lot that goes into a typical CCTV video surveillance system. While the cameras get most of the attention in the beginning, you also have other concerns, such as viewing, recording, and archiving the video footage, and the equipment required for carrying out those tasks. Here's a look at the basic components of a typical CCTV system.

CAMERAS

Security cameras are the starting point for most CCTV video surveillance systems. There are endless possibilities when choosing CCTV cameras and lenses – everything from fixed models designed for monitoring very specific locations, to day/night cameras, and powerful PTZ domes for patrolling large areas.

MONITOR

In a traditional CCTV security camera setup, operators view footage from a central location on a monitor very much like a TV, but with higher lines of resolution for better picture quality. Monitors can be dedicated (meaning they display video from a single camera), or call-up (meaning operators can access multiple cameras at the same time)

DVR

Most modern CCTV video surveillance systems incorporate DVRs (digital video recorders) which enable operators to reap some of the benefits of a network-based surveillance setup. DVRs convert the analog footage to digital, which helps to extend storage capacity, makes it much easier to search archived footage, and also allows users to stream video over a network for remote viewing from multiple locations.

For Businesses, Multiple Domain and More

DOMAIN AND HOSTING

Our Server provides enterprise-class data centre and hybrid cloud solutions that are simple to deploy, cost-effective, application focused,and user-centric.Greater flexibility and agility with Windows & Linux web hosting solution.

Web Domain

You don't know it yet, but you love us.
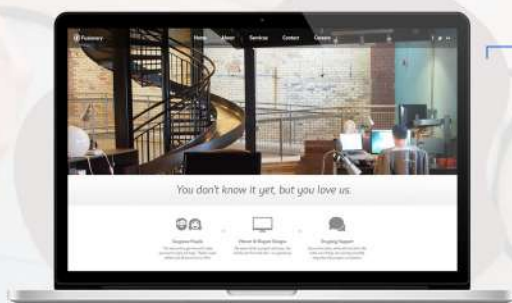

Under a shared web hosting environment, you and other website owners share one server which means that many websites are hosted using the same server.

This is the most common type of web hosting often termed as 'budget' hosting.

✔ **Free Domain Privacy** - *Protect yourself from potential spam and identity theft with a reliable Domain Privacy service.*

✔ **Free SSLs** - *Add further website protection with 50 SSL certificates.*

✔ **Free Website Builder** - *Build your dream website with over 200+ design templates to choose from.*

✔ **Free Email** - *Get the word out about your brand by setting up your very own email account.*

3D FLOOR PLAN
DESIGNING AND RENDERING

We offer Floor Plans Service that provides you with the different styles of floor plans that you can use in any marketing products.

Floor Plans can be presented in many ways. Assigning colors and textures, adding furniture and details to floor plans can give your clients the complete picture of a property.

- *2D Black & White Floor Plan*
- *2D Color Floor Plan*
- *3D Floor Plan*
- *3D Interactive Floor Plan*

3D Floor Plan Rendering

3D Floor Plans help the clients to see the whole house from above. All 3D floor plan renderings are created as 3D models with to-scale furniture and real life materials. 3D floor plans allow your clients to visualize the interior of the project in a way that a 2D floor plan cannot.

To create the 3D presentation of your new design, our skilled architect will take your ideas, sketches and photos, mixed with their construction knowledge and design talent, to produce an interactive 3D rendering of the entire area.
